

December Kindergarten Curriculum Concepts

This month in Language Arts we continue to focus on rhyming, and letters and sounds. We will study the letters Cc, Ei, Ss and Rr. We will also review letters that we have covered already. This month students will continue to work with family words such as the at family (cat, bat and fat), the an family (can, pan and fan), the op family (pop, top and hop) and the ig family (pig, big and wig). This is also the month we will begin two letter word Bingo Friday!

In Science, we will study hibernation, migration and things needed to sustain life. This will go along with our lessons about the changing seasons and how humans and animals adapt to the changes in an effort to sustain life. This will continue through January within our literacy lessons.

In Math, we will continue with the concept of numbers to 20 and reinforce extended number patterns. We will also move forward with our shape lessons to 3D shapes.

In Social Studies we will continue to learn about wants and needs throughout this holiday season. We will also share how we celebrate the holidays with our family.
